</> Technical Skills

⚙️ Core Front-End

React.js Next.js
TypeScript JavaScript
Tailwind CSS
TanStack Query Zustand
Redux React Hook Form
Zod

⚙️ Backend & Infrastructure

Node.js Express
TypeORM PostgreSQL
SQL Server REST APIs
JWT Docker
Docker Compose Nginx

🔗 Testing & Tools

Vitest Jest Git / GitHub
CI/CD Azure IIS
Stimulsoft Report

🗨️ Engineering Strengths

Frontend Architecture
Reusable Components
Enterprise UI RTL Interfaces
API Integration
Problem Solving

Education

B.Sc. in Computer Engineering

Islamic Azad University,
Tabriz | Sep 2023 –
Present

GPA: 16/20

Languages: Persian (Native),
English (B2)

Professional Summary

Front-End Engineer with 3+ years of experience building enterprise ERP systems, e-commerce platforms, dashboards, and full-stack web applications with React, Next.js, and TypeScript. Experienced in frontend architecture, reusable component systems, complex data tables, state management, API integration, and responsive RTL interfaces. Comfortable collaborating across frontend, backend, database, and deployment layers, with practical experience in Express, PostgreSQL, SQL Server, Docker, and .NET APIs.

Professional Experience

Front-End Engineer

Jul 2024 – Present

PETCO · Tabriz

- ▶ Lead frontend development for an internal ERP/MRP platform used by 200+ employees, built with React, TypeScript, Tailwind CSS, Zustand, and TanStack Query.
- ▶ Designed reusable architecture for CRUD-heavy enterprise modules, including PageShell abstractions, service factories, query-hook factories, validation, reporting, file uploads, and digital signatures.
- ▶ Built an advanced reusable data-table system with server-side pagination, multi-column filtering, range and date filters, global search, row selection, and batch actions.
- ▶ Implemented a persistent multi-tab workspace with drag and drop, temporary and permanent tabs, route synchronization, and localStorage state recovery.
- ▶ Integrated frontend modules with .NET Core APIs and SQL Server workflows, collaborating on contracts, validation, error handling, and business rules.
- ▶ Contributed to deployment and operational workflows using Azure, IIS, CI/CD, and Stimulsoft reporting.

Front-End Developer

May 2023 – Jul 2024

LoveLcode · Remote

- ▶ Served as the primary frontend developer across 7 commercial projects, including e-commerce websites, admin panels, dashboards, and landing pages.
- ▶ Built responsive interfaces from UI designs using React, JavaScript/TypeScript, Redux, Axios, MUI, Bootstrap, and SCSS.
- ▶ Developed reusable components, forms, data-driven pages, authentication flows, and API integrations while coordinating with designers and backend developers.
- ▶ Maintained consistent responsive behavior and cross-browser compatibility across desktop and mobile devices.

★ Featured Projects

NeoVault – Personal Knowledge Vault

[GitHub](#)[neovault.ir](#)

Next.js 16

React 19

TypeScript

Tailwind CSS 4

TanStack Query v5

CodeMirror 6

Express 5

TypeORM

PostgreSQL 16

Docker Compose

PWA

JWT

Self-hosted personal knowledge platform for managing links, notes, code snippets, AI prompts, infrastructure configs, and API collections. Built with Next.js, Express, TypeORM, PostgreSQL, and Docker, featuring encrypted credentials, full-text search, hierarchical organization, offline PWA support, and Nginx-based deployment.

NaziShop – Full-Stack E-Commerce Platform

[GitHub](#)[nazishop.ir](#)

Next.js 16

TypeScript

Tailwind CSS 4

TanStack Query

Zustand

React Hook Form

Zod

Express.js

TypeORM

PostgreSQL 16

JWT

Docker

Production-oriented Persian e-commerce platform with product variants, inventory, guest and authenticated carts, wishlist, coupons, reviews, returns, order tracking, OTP authentication, and role-based administration. Built with Next.js, Express, TypeORM, PostgreSQL, and Docker with full RTL support.

Portfolio Website

Zustand 5

jszip

Static Export

8-step interactive wizard that walks frontend teams through every major architectural decision – framework, folder strategy, design tokens, testing standards, UX patterns, and more. Detects conflicting choices in real time via a rule engine, previews the design system live, and exports a blueprint ZIP with 10 ready-to-use project files. 100% client-side, no backend.
